

Data Dictionary for Registration Dataset

Data Element	Definition
RECORD TYPE	The type of vehicle. BOAT = Boat SNOW = Snowmobile TRL = Trailer VEH = All other vehicles
VIN	The value that identifies a specific vehicle. For security purposes, a full VIN will not be displayed. 14-17 character VINs will display the first 11 characters; 4-13 character VINs will display all characters of the VIN except the last 3, and for 1-3 character VINs, no VIN will be displayed.
REGISTRATION CLASS	An alpha code that is used to classify the registration. (see complete list of registration classes below)
CITY	A city name for mailing purposes; appears in the last line of an address on a mail piece.
STATE	The official USPS abbreviation for the name of a mailing state, U.S. territory, Canadian Province, Commonwealth or armed forces ZIP Code designation. If APO/FPO/DPO, then the state abbreviation will be "AA," "AE," or "AP."
ZIP	A code that identifies a specific geographic mail delivery area. ZIP Codes can represent an area within a foreign country, a state, or a single building or company that has a very high mail volume. The zip code appears in the last line of the address on a mail piece. Example: 12345
COUNTY	The New York State county name that is the county of residence or use.
MODEL YEAR	The manufacturer model year of vehicle.
MAKE	The DMV code for the make of a vehicle that appears on the registration. The DMV make code is the first 5 letters of the vehicle's make name. If the vehicle make is more than one word, the make code is the first 2 letters of the first two words with a slash in between. (Examples, CHEVR, HA/DA)
BODY TYPE	The body type of a vehicle. (see the complete list of body types below)
FUEL TYPE	The fuel type of a vehicle.
Unladen Weight	The weight of a passenger vehicle without any load.

Maximum Gross Weight	The maximum weight that a commercial vehicle is permitted to carry.
